

## Multi-room AV

Whole-House Entertainment with the Greatest of Ease Imagine being able to hear your favorite music anywhere in the home while another family member listens to something else in a different room. Imagine pushing just one or two buttons to make your choice of music available instantly. No more fidgeting with buttons on your stereo equipment. Imagine hitting the DVD labeled button on your wall mounted LCD and the sound is automatically pumped into your speakers and you will see it on your TV. Or on your kitchen under counter mounted LCD! Sounds good? Then you need a GoElectronics multi-room system. Our systems feature high quality components discreetly concealed or tastefully presented in your central audio/video area. Decora-style keypads located throughout your home serve as convenient command stations that forward requests for volume, radio station, CD track, etc., to the central system. Instantly, the room you are in - or the entire house, if you wish - comes alive with beautiful stereo music playing through speakers installed flush into walls or ceilings. Multi-room systems deliver audio to several areas throughout the home, multi-source systems additionally give you the ability to play different sources (radio, CD, tape) in different areas SIMULTANEOUSLY.

Elan has a large family of control ideas, from the basic volume control to a fully integrated audio and video control system.
